

# 3D Paper Crunchy

- 1.** Have an adult help out with these first steps: Carefully cut along the dotted lines around Crunchy's body and wings. Using a sharp edge, carefully cut the slanted black line on each of Crunchy's sides—these will hold his wings in place
- 2.** Begin folding along the solid black lines on Crunchy's body.
- 3.** Crunchy is ready to take shape. Apply a small amount of paste to—or rub a glue stick across—the two dark red tabs above Crunchy's sides. Set these tabs in place behind Crunchy's front.
- 4.** Apply the same adhesive to the dark red tabs on the left and right sides of Crunchy's head. Fold that section down, holding the tabs in place while the adhesive sets.
- 5.** Crunchy is almost complete. After applying adhesive to the three remaining tabs, carefully fold Crunchy's back up and onto them. Hold the back portion in place as the adhesive sets.
- 6.** Finally, insert Crunchy's wings into his sides. He's all set!
